

(54) PUNCHING-OUT/TAKING-OUT DEVICE FOR TESTPIECE

(11) 6-273292 (A) (43) 30.9.1994 (19) JP

(21) Appl. No. 5-83962 (22) 19.3.1993

(71) NIPPON STEEL CORP(1) (72) HIDEAKA YAMASHITA(2)

(51) Int. Cl<sup>5</sup>. G01N1/04, B21D28/00, B21D28/02

PURPOSE: To automatically take out a testpiece efficiently from a sample member.

CONSTITUTION: A punching-out taking-out device for a testpiece takes out the testpiece from a sample member under the control by an NC controller controlled by an upper rank calculator, and is equipped with a means which specifies the taking-out enabled region for the testpiece which is to be taken out on the basis of the order specification by the upper rank calculator (Step 101, 102), and a means which determines the punching-out coordinates and the punching out order of each testpiece by an NC controller on the basis of the above-described result, kind of the testpiece, size and the standard coordinates which are previously set (Step 103).
